Modification of a Railroad Signal System**

In accordance with Part 235 of Title 49 Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by a document dated October 4, 2013, CSX Transportation (CSX) petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of a signal system. FRA assigned the petition Docket Number FRA-2013-0110.

Applicant: CSX Transportation

Mr. David B. Olson

Chief Engineer Communications & Signals

500 Water Street, Speed Code J-350

Jacksonville, FL 32202

CSX Transportation (CSX) seeks approval of the proposed discontinuance of a traffic control system (TCS) on main tracks between Control Point (CP) Mount Morris, Milepost (MP) CC- 26.2, and CP Middle River, MP CC-80.6, on the Saginaw Subdivision, Chicago Division, Saginaw, MI. A total of 67 controlled signals and 20 automatic signals will be removed, with 28 power-operated switches converted to hand operation. Approach signals will be installed at MP CC-27.9, CC-32.9, CC-35.0,

CC-49.1, CC-51.5, and CC-74.9. CSX Rule 261 will be replaced and operation will be under DCS/track warrant control rules. There are two locations that will remain as a TCS, with signals remaining in operation. Those locations are at CP South Kearsley, MP CC-33.54, an at-grade railroad crossing with the Grand Trunk Railway, and at CP Holly, CC-50.42, an at-grade railroad crossing with the Canadian National Railway. These locations will continue to be operated under CSX Rule CPS-261.

In its petition, CSX states that it seeks the proposed changes because CSX Rule CPS-261 is no longer needed for present-day operations.
